

THE GLEICHEN CALL

VOLUME 40 NO. 17

Authorized as second class mail, GLEICHEN, ALBERTA, WEDNESDAY JULY 9, 1947

SUBSCRIPTION \$2.00 PER YEAR

Board of Trade Hold Meeting

There was a good attendance at the Board of Trade meeting held last Friday evening in the dining room of the Hotel Gleichen.

Only two subjects were discussed, the swimming pool and the possibility that the new highway would by-pass Gleichen by a mile.

Regarding the swimming pool Mayor Sutermeister speaking on behalf of the town did not think the new dressing room as it is now would pass the board of health examination. He thought the floor of the building did not permit the proper drainage of water that dripped from the bathers when they entered the room.

The changing of the route of the highway at the foot of the hill to one that would then four miles south until it met the old highway thus by-pass Gleichen brought on a lengthy discussion.

The reason the engineers suggested the new route is now that it is not wide enough and practically impossible to make it wider on account to change the route was that in town of the buildings located there. It was finally decided that a committee of the Board of Trade be appointed to meet with the engineer and see if it was not possible have the route come from the four mile corner to just south of the town cemetery then east for a couple of blocks then turn north and meet the old highway. If this plan was adopted the road would go around the town and there would be plenty of room for the engineers to make the highway as wide as they wish to.

Senator Gershaw

Writes From Ottawa

The Bank of Canada started in 1933 and has consolidated revenue of \$100,000,000. The bank has a branch in each province and is managed by a governor and eleven directors. The original plan of the bank showed at all times it would require equal to 25 percent of its deposit and note liability, but this clause has been temporarily suspended.

Chartered banks for many years issued bank notes or bills or what is sometimes called folding money. The Bank of Canada has issued all notes of the chartered banks will be retired by 1950. There are very few in circulation now. Chartered banks must maintain a reserve of not less than 25 percent of its deposit and note liability, but this clause has been temporarily suspended.

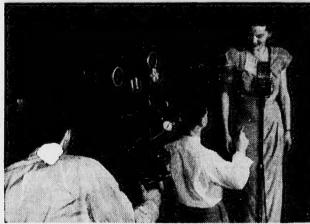

One function of the central bank is to regulate credit and currency in the best interest of the economic life of the people of Canada and to promote general welfare by preventing undue fluctuations in prices and employment as far as may be possible by monetary measures. Its duty is to regulate the volume of purchasing power in the country. The amount of money in circulation is increased when the banks increase their assets as bonds because money is paid out for such assets. When bonds are sold by the Bank of Canada the opposite result follows.

In times that the economy cannot be completely controlled the people speculate. An example there may be wild speculation in the markets, to some extent this can be influenced by increasing interest rates for borrowing and lending, more serious and warning speculators.

On the other hand in times of depression the bank can put more money in the hands of people by easy rates and by paying out money for bonds. On the other hand, interest rates on deposits nothing is gained because it is the velocity of circulation that help. A return of confidence is the needed factor so that people will spend for materials and services that create employment and trade and thus end depression.

The aim of the government is to anticipate extreme swings and to seek by preventive measures to maintain stability. Opinions differ on monetary affairs but we are agreed that inflation is the enemy. Government need money for the many and vast expenditures and up to the present the only recognized sources of such revenue is from borrowing and taxation.

News Items of Local Interest

Mr. and Mrs. MacCallum spent last week holidaying at the mountains resorts.

Miss M. Morley whose home is in Galtown has been spending the past week in town visiting her grand parents, Mr. and Mrs. G. T. Jones.

Miss Ann Hastings of Karskog, Galtown and Miss Evelyn Davies of Calgary are holidaying with Misses Pauline and Joy Sutermeister. At the present time they are all in Calgary taking in the Stampede fun.

Honoring Miss Grace Deshayes whose marriage is to take place shortly, a miscellaneous shower was held at the home of Mrs. R. S. McQueen when a large number of ladies from all over Canada on card for the occasion.

J. L. Kerr, the manager of the local branch of the Canadian Commerce has left to go north to spend his annual holidays.

Bob Brown, wife and family have gone to Banff for a holiday. It is safe to say that as he returns he will not be much activity around the Recreation Centre since it is the main branch there.

Mr. and Mrs. Pete Ristagno of the Mountain School should be given profuse and for the bluest marks in academic work or the seniors for the year. On May 24th Joy and her sister, Pauline, won first in the ladies division in the event of the Banff Boating Club which they keep for one year. They also brought home the Banff Outdoor Trophy for Ladies War Canoe, won the same day.

A burly "no" chief of police likes to be his subordinate, boasted, "I can lick anybody on my force." A still burlier "no" from his wife, "You can't lick me." The chief eyed him a moment and then waved him aside, "You are no longer on my force."

A burly "no" chief of police likes to be his subordinate, boasted, "I can lick anybody on my force." A still burlier "no" from his wife, "You can't lick me." The chief eyed him a moment and then waved him aside, "You are no longer on my force."

One of the enigmas of modern physics has just been solved by a United Kingdom scientist.

He has provided new evidence for a new law of the universe. This law establishes the relationship between electric electromagnetism and that of general relativity as well as linking electricity and magnetism with gravitation. The absence of any such observed link has long been one of the greatest baffles of science.

While he has provided the best scientific brains the world over with a theory that is of great interest to everybody these days is the United Nations. The new law of the universe has been named the League of Nations started active existence on January 10, 1920. United Nations got started twenty-six years later to the day, January 10, 1946. The League of Nations against Russia was one of the first questions before the League, as it is before the United Nations, to the J.S.

For the benefit of those growth of trees on a northern slope as compared with a southern slope is not hard to find. One needs only to examine the Bow River banks to find convincing proof that sites on northern slopes are capable of supporting vegetation even though the soil is thin. If one is ever given a southern slope on a northern slope soil retains moisture longer, new growth is not stimulated too early in spring, and the sun's effect on the rocks, resulting in more heat in the summer months is less pronounced. These circumstances individually and collectively aid tree growth.

Those who are inclined to believe

Many people from the town and districts attended the parade and stands in Calgary Monday and by the time the week is out about everybody in the town and districts will have seen the big show. Those who saw Monday's show readily agree that it was a grand performance, parade and all.

Miss Muriel Wheanley of Banff has returned to home after spending the long week end with Misses Pauline and Joy Sutermeister.

The Call has received word from Senator F. W. Gershaw that the Parks Branch at Ottawa has issued a statement that a cut stone monument with tablet to commemorate the public services of Crowfoot, Chief of the Blackfoot Confederacy is to be done this year.

Mrs. Charles Thompson and little girl left last week for Vancouver where she will visit her son Clifford and spend some time holidaying.

Mr. and Mrs. Tom Brown accompanied by Mr. and Mrs. Jack Wilson left by way of auto for the oil fields of Alberta and on Saturday they headed the call and getting into their car made the journey. Pete's friends were very glad to see him and an old story was retold.

While at Banff Joy Sutermeister received the Mountain School shield for general proficiency and for the bluest marks in academic work or the seniors for the year. On May 24th Joy and her sister, Pauline, won first in the ladies division in the event of the Banff Boating Club which they keep for one year. They also brought home the Banff Outdoor Trophy for Ladies War Canoe, won the same day.

A topic of conversation that is of interest to everybody these days is the United Nations. The new law of the universe has been named the League of Nations started active existence on January 10, 1920.

United Nations got started twenty-six years later to the day, January 10, 1946. The League of Nations against Russia was one of the first questions before the League, as it is before the United Nations, to the J.S.

It's old stuff—it's been going on all our lives anyway—we didn't know it took a broken leg to teach but

Patient: "I know you haven't, but there's something that strikes us as odd—up until lately in Brazil, names instead of the last name—Is it if your name should be Harry Jones you would be listed under the H's, not the J's.

It's old stuff—it's been going on all our lives anyway—we didn't know it took a broken leg to teach but

Patient: "I know you haven't, but there's something that strikes us as odd—up until lately in Brazil, names instead of the last name—Is it if your name should be Harry Jones you would be listed under the H's, not the J's.

If you get "rat-tled" or "lose your head," you place yourself at a disadvantage when nerves, concentration and prompt decision are demanded. Authorities point out that reaction in an emergency depends on how well one reacts on the state of one's health. Healthy people have themselves completely under control, they don't let temper or temperament get out of hand and they can be counted on for cool and effective action.

Those who are inclined to believe that prices of all products in "the good old days" were very much cheaper, however, reports suggest that the dollar had much greater purchasing power then than now. But even so, the cost of living at 9 cents a pound for 8 cents, maple syrup at 10 cents, and eggs at 10 cents a dozen are but few prices that make the present day housewife envy the women of confederation year.

More People Wanted To Donate Blood

If you were suddenly faced with a situation where you could save someone's life if you gave your blood what would you do? In reality this situation faces you minute, for somewhere in Canada there is someone dying for lack of blood—blood which can be given without discomfort and without discomfort to yourself.

It may be a little child broken and crushed as it played on the streets, it may be a young mother, whose life is in jeopardy after childbirth, or a woman injured in an accident. It may be your neighbor who at death's door—or a member of your own family—but it is a fellow Canadian! Tomorrow, it may be you!

The Canadian Red Cross is setting up in Alberta a new peace-time transfusion service. Many small units will now receive from central units. They will visit your community. These clinics and mobile units will be the sole source of life giving blood to the Alberta Hospitals—and the hospitals will in turn give this blood to whoever needs it entirely free of charge.

To carry out this great humanitarian work the Red Cross needs your help, it needs you as a voluntary blood donor. If you have not yet registered with your local Red Cross branch, tell them you will be glad to help save a life!

Things of Interest

In our pioneer days when there were few outlets for expression of public opinion the petition was a useful and powerful weapon. This situation has changed with the development of powerful farm organizations, boards of trade, settled cities, newspapers, periodicals and publications of all kinds, and radio. Today a petition, signed even by 500,000 people is a sign of weakness in a cause rather than strength. It shows support by only 7 percent of Canada's seven million electors.

How do you explain it? In times of trouble, said Indians have strenuously discouraged a war and shortages, and presto, the darlings gain two inches around the hips—that's what the national manufacturers of women's clothes say. Stick out your chest a woman's magazine says men have more courtesy than women.

Dentist—"Stop waving your arms and making faces, sir, now, I haven't even time to wash my hands."

Patient: "I know you haven't, but there's something that strikes us as odd—up until lately in Brazil, names instead of the last name—Is it if your name should be Harry Jones you would be listed under the H's, not the J's.

Canada's 1946 tobacco crop was the largest ever recorded, the bulk of 90,000,000 pounds in western Ontario. It is estimated that there were 80,000,000 tobacco plants in western Ontario when the white man first arrived.

Credit For Farmers

A REPORT TABLED RECENTLY in the Canadian House of Commons by Finance Minister Abbott gave some very interesting facts regarding the advantages which farmers have taken of the provisions made by the government in 1946 for loans for the improvement and development of farms through chartered banks for the improvement and development of farms, the loans extending over a period of ten years at an interest rate of five per cent. Finance Minister Abbott's report showed that 13,030 Canadian farmers, including more than 10,000 from the Prairie Provinces obtained loans last year under the scheme. The total farm purchases amounted to \$6,880,565. It was also pointed out in the report that the banks had made claims on the government to recover losses, showing that the farmers who had borrowed money had met the terms of their agreements.

Loans Used For Many Purposes In Alberta 4,788 farmers borrowed money to the amount of \$3,388,115, while in Saskatchewan 4,075 loans were made, amounting to \$3,140,157. Manitoba farmers made 1,928 loans, totalling \$1,397,638. The use of the loans was varied to purchase farm implements and farm houses, the report showed, and the thousands of acres of land were broken by the 1,008 farmers who borrowed money for this purpose. Others obtained loans for foundation and breeding stock and there were 303 farmers who borrowed for this reason, their loans totalling \$190,937. It was observed that loans for the construction, repair and alteration of farm buildings were also provided, and that it was expected that the demand for them would be large when construction materials became more plentiful.

Credit Needed In Business Credit is an important factor in any business, and farmers are no exception in this regard. Canadian banks have played a very valuable part in the development of farming communities but the legislature enacted in 1946 was aimed at giving assistance to the average farmer who "in most cases just cannot get a job at a bank credit for the purpose of aiding his improvement." In the year 1946, the first year in which the measure was in operation, there was a great many farmers made use of the loans, and that there were no cases of default on the part of those who borrowed. Farming is one of our largest and most essential industries but farmers have not always received as much encouragement and support as might be desired. Extension of credit is one means of providing for the improvement and development of farms and should be viewed with favour by all sections of the public.

Pigeon Turns Up 1,600 Miles From Home

STRATFORD, Ont.—David Davidson, the local homing pigeon, has turned up in a village 1,600 miles away. The Stratford pigeon fancier learned that the wayward bird, unreported since 1941, had the Davidsen loft at Alliston, Ont., "adopted" by a former owner, Dick Irvin of Regina, Irvin, who spends his winters competing in National Hot-weather League Canadien, says he has had birds return to him from as far away as Ottawa. He sold the four-year-old to Davidson in 1944.

One of Whistler's rejected paintings was accepted later by an art gallery when he submitted it upside down.

RAIRIE CROP PROSPECTS GOOD

OTTAWA.—Prospects are good for at least an average crop, barring development of adverse weather and moisture conditions in the critical period now and early in August, the Dominion Bureau of Statistics said in a report on a covering Prairie condition. The most serious hazard to the current crop may have to face is the possibility of frost damage, the report said. The stage of development of the crop is now 10 to 15 days to two weeks later than normal and the probability of damage by late frosts is thereby greatly increased.

Manitoba, growing conditions having been good, crop generally is making "very satisfactory" progress. Conditions in southern Saskatchewan are "marginally satisfactory," a first crop all steps forward in growth while prospects in Alberta continue to be "very favorable."

Sea Fish Extinct Caught Near South Africa

GRAHAMSTOWN, Cape Province, South Africa.—A shark association is organizing a hunt to catch a "modern dodo," a fish species believed extinct for the last 50,000 years.

First clue that this fish, a coelacanth, still survived, came in 1938 when a traveler brought up a mysterious fish he had found in a blue in color and weighing 127 pounds.

When the fish was caught, it

was landed and one of the fishermen said in 30 years of fishing he had never seen such a " queer looking oddball."

The remains of the fish are in an African museum.

Census Shows Fewer Horses In Manitoba

OTTAWA.—The number of horses in Manitoba is decreasing rapidly in numbers, figures released by the Dominion Bureau of Statistics show. These were the preliminary figures of the 1946 prairie census, and they report a decline from 301,763 horses in 1941 to 215,084 last year, a 29 per cent. drop.

Value of Manitoba's farm horses increased from \$10,377,887 in 1941 to \$10,724,450 on June 1 last year, a decrease of one-third.

While the horse population was declining, the cattle population was gaining in number, figures show. The cattle population in Manitoba in 1941 was 79,635, compared to 70,337 five years earlier, and 74,737 in 1936.

The value of cattle showed an increase from \$26,455,625 in 1941 to \$28,495,164 in 1946 and only \$14,238,422 in 1936.

The number of sheep declined to 205,516 from the 1941 total of 246,169 and was slightly below the 1936 total of 210,000. The value dropped from \$40,455,625 in 1941 to \$38,023 last year, but there will be more than there were in 1936, when 269,705 were produced.

The number of swine declined to 17,000 from 1941 to 17,000, and 16,000 in 1936.

The number of sheep declined to 17,000 from 1941 to 17,000, and 16,000 in 1936.

The number of swine declined to 17,000 from 1941 to 17,000, and 16,000 in 1936.

The number of swine declined to 17,000 from 1941 to 17,000, and 16,000 in 1936.

The number of swine declined to 17,000 from 1941 to 17,000, and 16,000 in 1936.

The number of swine declined to 17,000 from 1941 to 17,000, and 16,000 in 1936.

The number of swine declined to 17,000 from 1941 to 17,000, and 16,000 in 1936.

The number of swine declined to 17,000 from 1941 to 17,000, and 16,000 in 1936.

The number of swine declined to 17,000 from 1941 to 17,000, and 16,000 in 1936.

Wheat Pool Patronage

The Alberta Wheat Pool intends to carry on for the crop year 1947-48 on the same basis paying a patronage dividend to farmers with the principles under which the Pool was formed. The following notice is intended to comply with the provisions of the Income Tax Act.

"As required by the Income Tax Act, this will advise our members, as referred to in the said Act, that, in accordance with the terms and conditions agreed to by the members of the Alberta Wheat Pool, we will not be entitled to pay a dividend in proportion to the 1947-48 patronage out of the revenues of the 1948 taxation year or out of such other funds as may be permitted by the said Act, and we hereby hold out the prospects of the payment of a patronage dividend to you accordingly."

HERE AND THERE

Canadian breeding and marketing
associates have created the Barley Im-
provement Institute of Canada with an
endowment of more than \$350,000,
over a five year period. Located in
Winnipeg, it will co-ordinate
an overall barley improvement and
marketing plan. breedership, dis-
tribution of breeding barley seed
Barley Contest, and engage in educa-
tional and extension work for the
improvement of the quality and
quantity of malting barley in Canada.
Close co-operation will be maintained
with the federal and provincial depart-
ments of agriculture, agricultural
organizations, and the agricultural col-
leges of Canada.

Some time ago a colored woman pre-
sented herself at a registration booth
with the intention of enrolling and
casting her first vote in the ensuing
election. She was asked for her ad-
dress, and her age, and then the clerk
of registration asked her this ques-
tion: "What party do you affiliate
with?" The woman's answer fairly
put him out of countenance. "Do you
want to answer that question?" he de-
manded. "That is the law," he told
her. "Den you jes' scratch mal name
offen books," she said. "If I gotta
tell his name I don't wanna vota. Why
isn't he got his divorce yet?" And
that settled it.

Contrary to the idea prevailing in
some quarters, racial equality is
achieved with goodly regularity, while
others aren't so sure that vision
is given to all races equally—it's the
training and use of eyes that makes
the difference. Using our eyes, we

MISCELLANEOUS A.D.

with fob. Reward. Apply to C. J.
Robson.

FOR SALE BY OWNER—107 acres
land, no. S.E. 26-23-23. Not irrigated,
clear of debt. Want cash offer. Ruth
Benedict, 513 West 4th Ave Emporia,
Kansas, U.S.A.

saw the other day a picture of a con-
trapTION that quite interested us, it's
a new type truck with the front
part of the engine with all the
driving controls in one unit with the
front wheel—so that if anything
goes wrong the front unit can be
dislodged, not including the cab and
wheeled right out for repair—the way
a car is towed. It's a good idea.
So the next time you are in a garage
if some one comes in trundling the
working part of his truck behind
him, don't be fooled—it's not an accident—just a new delivery truck
out for repair.

Here's a question...can you tell us
of what city Jaffa is the port?—the
name is very ancient; it's name begins
with J, and you can't think of any
place. What that thought is tantalizing
to completion, let's look at an interesting
light on murder—according to
a four-year survey at one prison,
it has been noted that murderers
are more inclined to two things.
The older men tend to murder women
over such things as love affairs, and
the general tendency is violence—
the younger men tend to murder other
men for economic reasons.

Every year many adults, and especially
children are poisoned with plants with
poisonous properties. Some persons only
touch a plant to be afflicted with severe
skin inflammations and water blisters
and others eat it. It is important to know
what to do when you are bitten or
touched by a plant.

POISON IVY—Poison Ivy is a
woolly perennial shrub which multiplies
by seed and underground rootstocks.
In the prairie provinces it is
largely a tree 12 to 18 inches in
height. The leaves of Poison Ivy
always consist of three leaves. The
middle leaf is larger than the others,
and the two side leaves are smaller.
It reminds us of the one sure way to
spot Poison Ivy. They are
usually oval in shape. They are
smooth and leathery with an
irregular, wavy margin and
have no veins or midrib.
The leaves are divided into
three leaflets at the base of the
axis of the leaves. The berries are an
usually creamy-white in colour. A photograph of Poison Ivy has been
supplied by the Canadian Seed Trade
Association. Seeds of Poison Ivy
can be obtained, free of charge,
from Line Elevator grain
barns. Seedsmen should avail
themselves of this opportunity.

Control—Since Poison Ivy is
largely a tree in the prairie provinces
it is difficult to eradicate it, how-
ever, when found in prairie ground-
summer resorts, and other ground
frequented by people, particularly
children, it should be pulled out
and burned. If hand pulling is
undertaken, rubber boots and
gloves should be worn and all
clothing washed after the job is
completed. Spraying with sodium
chlorate will be an effective control
of the plant, though in some
applications are usually necessary.

Treatment for Poisoning—Many
remedies have been suggested to
ease the burning irritation
caused by Poison Ivy. The United
States Public Health Service
recommends a 10 per cent alcohol solution
of tannic acid as a lotion. If poisoning is severe,
a physician should be consulted
before any home remedies are applied.

**"NOW WATCH ME
WIN THAT RIBBON!"**

SANDY SIMPSON has been patiently
improving his dairy herd. He saw his
chance to buy a pure bred bull—and
the manager of his bank lent him the
ready cash to close the deal. Now he's
expecting great things of his new calf;
already he sees her winning her class at
next year's Fall Fair. A few more like
her and he can also see his milk
production rising—as well as a nice extra
income from selling his surplus stock to
neighbouring farmers.

Branch banks, in rural communities
across Canada, help to build prosperous
farms... and at the same time help
increase the flow of food to family tables
both at home and in distant lands.
